

# AURORA

Eco-line wearables

Turtles: Longevity of ocean & sea wellness beyond human life spans.

Ice: Fountains of fresh drinking water.

Madrone: Rain capture for watersheds on mountain ranges.

Olive: Symbol of peace.

Honey bee-Pollinators for vegetable patches and immune boosters.

Sea Grass: feeding grounds for mother turtles.

Forest Flaneur <https://www.forestflaneur.com/> and

Artist Angela Thwaites <https://www.angelathwaites.com/>

Announcement: A new collaborative eco-line collection of wearables. Upcycling glass to merge with a poetic palette inspired by our very dear planet, Earth.

Aurora was born out of a collaboration between forest flaneur Rosalinda Ruiz Scarfuto and glass artist Angela Thwaites, fusing their talents to create a line of wearable art that becomes an ambassador for ecological awareness. Rosalinda first visited Mer de Glace (France) glacier in 2019 and was devastated by the ice melting at an alarming rate. Since then, the forest flaneur has branched out into other ecosystems. Through Angela's experimentation with glass, the character of the pieces transforms the poetic response into an heirloom treasure to wear and pass onto future generations.

Angela and Rosalinda first met at the National Glass Centre, UK. while researching for their respective PhDs in art practice.

Palette colour inspirations:

				
				
Mer de Glace France	Madrone Trees California	Sea Grass Mediterranean	Turtle Hatchlings Australia	Honeybee Spain
